We’re looking forward to showing Fifa 22 Serial Key players the world of ‘HyperMotion Technology’ and demonstrating the beauty of PES football.” Real-life match data collection remains the cornerstone of the PES series, and has been used extensively in both PES 2018 and FIFA 19. This year, the data collected by the 22 FIFA players, which included intensity, movement speed, acceleration, passing accuracy and shot accuracy, served as the basis for new developments to be incorporated into FIFA 22. FIFA 22 introduces “HyperMotion Technology,” which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. “As players in the PES series, we are able to accurately reproduce the physics of match situations like an airball,” said PES Product Lead Masayasu Hirano, “and the data collected from the real-life players’ movements helps us faithfully recreate the full intensity of a match.
